WELCOME TO BYJU'S NATIONAL APTITUDE TEST (BNAT)

Dear **Diksha Ghanshyam Birhade** ,

Thank you for taking BYJU'S National Aptitude Test (BNAT).

You must have been awaiting the outcome and analysis of the assessment that you took on November 21, 2021. The findings are now here. These have been understood, analysed and interpreted to comprise this report. You will find an elaborate explanation of your Physics, Chemistry and Biology in the report. The findings of this report are based entirely on the observations of academic and scholastic performance demonstrated by you during the online assessment. The information in this report is specific to you.

We recommend that you and your parents familiarize yourselves with the report before the one-on-one interaction with BYJU'S Education Counselor.

The BYJU'S Education Counselor will guide you through macro and micro analysis of your BNAT result, and assist you in taking the right career decision.

We wish you all the very best for your future.

It is strongly recommended that the report is viewed in its entirety and not a part thereof.

ABOUT THIS REPORT

This report provides an in-depth description of your responses to the BYJU'S National Aptitude Test (BNAT). It is designed to help you identify and understand your potential and learning pattern.

a) The findings of this report are based entirely on the observations of academic and scholastic competence demonstrated by you during the online BYJU'S National Aptitude Test (BNAT). The information in this report is specific to you.

b) When you are making career decisions gather as much information as possible.

c) The analysis drawn in this report are based on single evidence and hence must be supplemented with other information such as academic grades, etc. The results of this report should be used with caution.

THE REPORT CONTAINS THE FOLLOWING SECTIONS

Section A - Learning Pattern Analysis

Section B - Test Summary

Section C - Keep Learning

LEARNING PATTERN ANALYSIS

This section of the report will help you in understanding your potential skills and abilities. It will further help you to identify the skill areas which you can develop, in order to be proficient in your chosen career path

1.Overall Analysis (Good): A good overall score indicates that your Learning Skills are in sync with the requirements of competitive exams. You must work in the areas outlined in the report. A combination of Hard Work and Learning Skills will prove instrumental in cracking competitive examinations

2.Physics (Good): Physics is the science of how things work. A good score in Physics indicates that you are satisfactorily skilled at understanding how things work. This skill will prove very useful in competitive examinations. Keep the skill sharp by always understanding the concepts by visualising them

3.Chemistry (Good): Chemistry is the study of matter, its properties, how and why substances combine or separate to form other substances, and how substances interact with energy. A good score in Chemistry indicates that you are satisfactorily skilled at understanding the basics of chemistry. This skill will prove very useful in dealing with Physical, Inorganic, and Organic Chemistry of Class 11 and 12. Keep the skill sharp by always revising the concepts you learn.

LEARNING PATTERN ANALYSIS

4. **Mathematics (Focus Area):** Mathematics is the study of the measurement, properties, and relationships of quantities and sets, using numbers and symbols. Mathematics is a Focus Area for you, it indicates that you need to work on this subject. It is recommended that you understand the concepts by visualising them and focus on retaining the concepts by revision. This skill will prove very useful in attempting engineering entrance examinations (like JEE, WBJEE, KCET, AP EAMCET, GUJCET, etc), and prepare for Olympiads and talent hunt exams.

5. **Biology. (Good):** Biology is the scientific study of living things. A good score in Biology indicates that you have a basic knowledge of living organisms and how they function. This skill will prove useful in preparing for NEET and other competitive examinations. To improve your skills, visualise concepts, and use animated diagrams.

6. **Application (Good):** A good score in Application indicates that you are skilled at the usage of concepts and interlinkages to arrive at a solution/ answer. This skill will be very useful in attempting questions that involve a combination of concepts. Keep the skills sharp by attempting questions involving multiple concepts.

7. **Retention (Good):** A good score in Retention indicates that you are skilled at dealing with the usage of formulas and/or memorization of conditions. This skill will be very useful in retaining close to 500 concepts and formulas required for competitive examinations. Keep the skill sharp by making your own notes and revising them at appropriate moments

KEEP LEARNING

KEEP LEARNING

Assessment is a continuous process which does not end with just an evaluation. In fact this is just the beginning. You need to work hard to succeed in tests and interviews and finally do wonders.

Having identified improvement areas, you need to ask yourself the following questions:

- *What is the objective? How can I define the goal that I am aiming for?*
- *What specific methods will I enrol? For example if classes / seminars / Workshops are required then what exactly?*
- *What time frame is realistic for my goals ?*
- *What resources do I require to make my development happen in a sustained manner?*

Development initiatives fall into one of the below categories:

- *Self development activities*
- *Guidance or Counselling*
- *Administrative support (like projects, classes/seminars/trainings/ workshops, etc.)*

It is strongly recommended that the report is viewed in its entirety and not a part thereof. The information in this report is specific to your performance in BNAT on November 21, 2021.

Wish you great success as you embark on your journey towards excellence!!
